

# MILAN STANOJEVIĆ

## Full-Stack Developer

Belgrade, Serbia • +381 65 441 57 83 • milan.nbg95@gmail.com

[github.com/milanNbg](https://github.com/milanNbg) • [linkedin.com/in/milanstanojević](https://linkedin.com/in/milanstanojević)

### PROFESSIONAL SUMMARY

Full-Stack Developer with 4 years of experience building enterprise React and TypeScript applications for B2B SaaS platforms in the HR and payroll domain. Strong focus on front-end engineering — reusable UI architecture, responsive interfaces, API integration, state management, and testing — with additional hands-on experience in C#, ASP.NET Core, Dapper, and SQL Server for REST API and database delivery. Experienced in collaborating with product, design, and backend teams in Agile environments, using Git, CI/CD pipelines, and Azure-based workflows.

### TECHNICAL SKILLS

**Programming Languages:** JavaScript, TypeScript, C#

**Frontend:** React, React Router, HTML5, CSS3, SASS/SCSS, Material UI, Tailwind CSS

**State Management:** React Context, useReducer, Redux

**API Integration:** REST APIs, GraphQL

**Testing:** Jest, React Testing Library, Playwright, MSTest

**Backend:** ASP.NET Core, Dapper, SQL Server

**Tooling & DevOps:** Vite, Webpack, npm, pnpm, Git, Azure DevOps, CI/CD

**AI-Assisted Development:** GitHub Copilot, Claude — refactoring, debugging, test scaffolding, code review

### PROFESSIONAL EXPERIENCE

#### Paycor

##### Medior Full-Stack Developer

Aug 2024 – Apr 2026

- Developed and maintained enterprise-grade React and TypeScript features for a B2B HR and payroll SaaS platform, focusing on reusable UI architecture, complex workflows, and maintainable front-end code.
- Developed reusable and visually consistent UI components using MUI (Material UI) and SASS/SCSS, improving responsiveness, usability, cross-browser compatibility, and overall visual quality across the application.
- Managed complex front-end state and user flows using React Context, useReducer, and Redux for global state.
- Integrated front-end features with REST and GraphQL APIs, working closely with backend teams to align UI behavior with service contracts and domain requirements.
- Implemented responsive and pixel-accurate UI solutions based on Figma specifications and shared design system guidelines, collaborating closely with designers, product managers, and backend teams.
- Wrote and maintained unit, integration, and end-to-end tests using Jest, React Testing Library, and Playwright, supporting regression validation for UI and styling changes before release.
- Resolved complex UI, styling, layout, and responsive design issues, reducing regressions introduced by component and CSS updates.
- Worked with modern frontend tooling including Vite, Webpack, npm, and monorepo workflows supporting reusable UI systems and shared frontend modules.
- Implemented REST API endpoints in ASP.NET Core using Dapper for data access against SQL Server, supporting end-to-end feature delivery and aligning service contracts with UI requirements.
- Configured and maintained CI/CD pipelines and Azure resources using DAPS (DevOps Asset Provisioning), supporting deployments across multiple environments.

## Junior Full-Stack Developer

Nov 2022 – Aug 2024

- Built responsive and adaptive user interfaces using React.js and SASS/SCSS, improving visual consistency, usability, and cross-browser compatibility across internal applications.
- Developed reusable and maintainable UI components such as inputs, dropdowns, modals, and form controls to support scalable and consistent frontend workflows.
- Integrated frontend applications with backend services through REST APIs and supported internal navigation using React Router.
- Wrote and maintained unit tests with Jest and React Testing Library to improve UI reliability and minimize regressions during component and styling changes.
- Built and maintained RESTful APIs in ASP.NET Core using Dapper for data access against SQL Server, and wrote unit tests with MSTest to improve service stability and support front-end integration.
- Collaborated with multiple domain teams and designers to troubleshoot UI bugs and improve application workflows.
- Worked in an Agile/Scrum environment, participating in daily stand-ups, sprint planning, and retrospectives while collaborating effectively with distributed teams.

## Software Development Intern

Jul 2022 – Nov 2022

- Assisted in maintaining internal UI forms and documentation-related features supporting client data management.
- Debugged and refined Product Backlog Items (PBIs), including UI text updates and employee sorting functionality.
- Completed onboarding and gained familiarity with internal tools, development workflows, and Agile processes.

## EDUCATION

---

### Master of Science in Information Technology (part-time)

2021 – Present

Information Technology School, Belgrade

### Bachelor of Science in Information Technology

2014 – 2018

Information Technology School, Belgrade

## LANGUAGES

---

**English** — Upper-Intermediate (B2)

**Serbian** — Native
